

Requests for Available Flowgate Capacity (AFC) Related Information^{*} (Methodology & Data)

Send requests to AFCDATAREQUEST@entergy.com

AFC Calculation Methodology Requests

Requests related to Entergy's AFC calculation methodology should be sent to AFCDATAREQUEST@entergy.com. The request should clearly specify the methodology information needed. These requests may include, but are not limited to:

- Derivation of values
- Underlying assumptions
- Data inputs

Entergy will communicate to the requestor within one week of receiving the request either a full response or an estimate of the amount of time needed to respond.

Requests for data to be used in the requestor's ATC or AFC calculations (MOD-001-1a R9)

Transmission Service Providers, Planning Coordinators, Reliability Coordinators, or Transmission Operators requiring the data listed in MOD-001-1a R9 solely for use in the requestor's ATC or AFC calculations should send a request via email to AFCDATAREQUEST@entergy.com. The request should clearly specify the data needed and how the requestor intends to use the data. These requests may include any of the data items listed in NERC Reliability Standard MOD-001-1a R9.

Entergy will begin to make the requested data available to the requestor within 30 calendar days of receiving the request.

Notes:

- Final responses to requests are coordinated between Entergy and the ICT prior to communicating to the requestor.
- The AFCDATAREQUEST@entergy.com email address is the official method of submitting the types of requests listed above. While there are other means of making requests on OASIS ([Contacts](#) listing), requestors should be cognizant that these alternate means could result in delays in response times.
- The [Contacts](#) listing on OASIS provides phone and fax numbers for contacting the appropriate parties as indicated in the listing. If the requests above can be accommodated via the [Contacts](#) listing on OASIS, efforts will be made to resolve the request on the phone. Many requests will not be able to be resolved via phone. In that case, the requestor will be directed to officially send their request to AFCDATAREQUEST@entergy.com.
