1. PROJECT SUMMARY

1.1. Background and Project Need

The purpose of this Facilities Study is to determine the availability of transfer capability across Entergy's transmission system from Central and South West Services (CSWS) to Central and South West Services (CSWS) to evaluate an affected system study request from Northeast Texas Electric Cooperative for 8/16MW of yearly network transmission service. The time period for this transfer is from 1/1/2013 until 1/1/2015. The direction of the transaction is CSWS to CSWS. The study was performed on the latest available January 2013-June 2014 monthly models, 2014 winter peak seasonal model, and 2014 summer peak seasonal model using PSS/E and MUST software by Power Technologies Incorporated (PTI).

The facilities study identifies any transmission constraints resulting from the requested power transfer. The facilities study also includes cost estimates to correct any transmission constraints.

1.2. Scope Summary

The System Impact Study identified minimal flows (1.1 MW or less) on a limited number of existing constraints. Some of the existing constraints were related to possible future planned outages of limited duration. Given the minimal impact on Entergy's system and the fact that this request relates to service on SPP's system, Entergy has concluded that this service can be granted without any negative impact on transmission operations and existing transmission service on Entergy's system.

No Entergy system upgrades were identified as a result of this request.

1.3. Cost Summary

None

1.4. Schedule Summary

None

1.5. Automatic Generation Control

Not applicable

2. SAFETY REQUIREMENTS

Not applicable

3. GENERAL ASSUMPTIONS

Not applicable

4. SCOPE OF WORK

Not applicable

5. COST

No upgrades or FFRs have been identified.

6. SCHEDULE

Not applicable

7. RISK ASSESSMENT

Not applicable

8. CONFIRMED RESERVATIONS
