**Non-TOA Transmission and BES Facilities**

The following table reflects Transmission Owners' individual listings of transmission facilities over which ISO has operating authority in accordance with a Market Participant Service Agreement, a transmission operating agreement other than the ISO's primary TOA, or the Open Access Transmission Tariff. The BES designation by ISO New England is utilized to ensure ISO New England has Operating Authority over such facilities.

## TOA Transmission and BES Facilities (including Schedules 2.01(a) and (b) postings)

The following table reflects the Participating Transmission Owners' individual listings of transmission facilities over which ISO has operating authority in accordance with the ISO's primary TOA. It also includes the applicable Category A Facility, Category B Facility, Bulk Electric System (BES) and PTF designations. This tables meets the TOA's Section 2.01 requirements for PTOs to develop and maintain current Category A and B listings within Schedules 2.01(a) and (b), respectively, and for ISO to maintain on its OASIS a posting of the current versions of the Schedules 2.01(a) and (b).

The BES designation by ISO New England is utilized to ensure ISO New England has Operating Authority over such facilities.
