

Registration

To become a customer of LG&E and KU Open Access Transmission Tariff (OATT), the first step is to forward the following information to the ITO contact listed at the end of this document:

- A cover letter that includes a statement that your company "is an eligible customer under LG&E and KU's Open Access Transmission Tariff."
- A 24-hour contact person with their name, phone, email, fax, etc.
- NERC Entity Code

The information above, along with the following financial information should also be sent to the LG&E and KU contact listed at the end of this document:

- A billing/financial contact person with their name, phone, email, fax, etc.
- Your financial information as described in Attachment L of the LG&E and KU OATT. (including, but not limited to, past three years of audited financial statements, your current senior unsecured debt rating report from Standard & Poor's or Moody's, your Dun & Bradstreet (DUNS) number and any other information you wish to have considered.)

Thirdly, obtain and register digital certificates for access to the LG&E and KU OASIS. This will allow a customer to submit Transmission Service Requests (TSRs) on the LG&E and KU OASIS. Upon submission of TSR(s) and any required studies by the ITO/TO, the customer will execute the appropriate Transmission Service Agreements. Digital certificates are available from multiple 3rd party vendors, two of which are [OATI](#) and [GlobalSign](#).

- **Short-Term and Long-Term firm PTP Transmission Service** - To receive short-term and/or long-term firm Point-to-Point transmission service, a customer must submit a Transmission Service Request (TSR) on LG&E and KU's OASIS node, and execute a Transmission Service Agreement (TSA). The standard agreement or "Form of Service Agreement for Firm Point-To-Point Transmission Service" can be found in [Attachment A](#) of LG&E and KU's OATT. The customer must execute and return the agreement prior to the start of service.
- **Non-Firm PTP Transmission Service** - To receive non-firm Point-to-Point transmission service, a customer must submit a Transmission Service Request (TSR) on LG&E and KU's OASIS node, and execute a Transmission Service Agreement (TSA). The standard agreement or "Form of Service Agreement for Non-Firm Point-To-Point Transmission Service" can be found in [Attachment B](#) of LG&E and KU's OATT. The customer must execute and return the agreement prior to the start of service.
