

# **ITO Stakeholders Meeting**

## **2018 TEP Stakeholder Input Requested**

Mary Melvin, Manager, Transmission Planning

November 2016

---

---

- TO has requested data (was due October 31, 2016)
- TO is reviewing data and building models
- ITO is also reviewing data and will review models when provided by TO
- Stakeholder input on development of the 2018 TEP is requested and must be provided by December 17, 2016
  - Send to
    - [support@transervinternational.net](mailto:support@transervinternational.net)

- Attachment K, Section 5 – Comparability

Stakeholders may propose transmission, generation and demand resources or other alternative solutions to needs identified during the transmission planning process, and proponents of all alternative solutions will be given equal opportunity to participate. Any entity proposing resources must complete a data sheet which will be posted on OASIS that will identify direct control load and interruptible demand. Advanced technologies and demand-side resources will be treated comparably, where appropriate in the transmission planning process, to transmission and generation solutions. Transmission plans developed under this Attachment K will be technology neutral, balancing costs, benefits and risks associated with the use of demand-side resources, transmission, generation or other alternative solutions to meet the needs of transmission customers and the Transmission Owner.
