NV ENERGY: LARGE GENERATOR INTERCONNECTION PROCESS

**Notice to Transmission Provider**

1. Submit Pre-Application Request per section 3.2 of Attachment N of the OATT
2. Within 5BD, review the Pre-Application for validity of the request. Notify Interconnection Customer of validity of request or deficiencies
3. Within 20BD of completed Pre-Application Request, Pre-Application Number is assigned and external pre-application meeting held
4. Interconnection Customer and Transmission Provider work to finalize the Pre-Application Request. (i.e., address lands and generation data issues, etc)
5. Complete Pre-Application Process after all items in Section 3.2 & 3.3 are satisfactorily completed
6. Transmission Provider notifies the Interconnection Customer that their Pre-Application Process was completed; Interconnection Queue Position established
7. Transmission Provider has 10BD to schedule a Scoping Meeting with the Interconnection Customer
8a. If applicable, the Interconnection Customer submits a waiver, opting out of the Scoping Meeting.
8b. If opted for, the Scoping Meeting will be held within 30CD of the completion of the Pre-Application Process unless otherwise agreed
9. Transmission Provider to provide a Interconnection System Impact Study Agreement to the Interconnection Customer for review and execution
10. Within 30CD, the Interconnection Customer will return the executed Interconnection System Impact Study Agreement, per section 7.2 of Attachment N of the OATT
11. Transmission Provider will use reasonable efforts to provide the Interconnection Study within 120CD after the close of the queue cluster window.
12. Transmission Provider will provide the Interconnection System Impact Study results and the Interconnection Facility Study Agreement, if required
13. Within 30CD, Interconnection Customer will return the executed Facility Study Agreement per section 8.1 of the Attachment N of the OATT
14. Transmission Provider will use reasonable efforts to complete Interconnection Facility Study within 120CD of receipt of the executed Interconnection Facility Study Agreement
15. Transmission Provider will provide a copy of the draft Interconnection Facilities Study
16. Within 10BD of issuance of draft Interconnection Facilities Study results, Transmission Provider and Interconnection Customer will meet to discuss the results of study
17. Within 30CD of issuance of draft Facility Study results, Interconnection Customer will comment on draft Interconnection Facilities Study or waive right to comment
18. Transmission Provider has 15CD after receipt of comments or waiver of no comments, to incorporate comments and issue final Interconnection Facility Study. Transmission Provider is allowed to reasonably extend such 15CD period if comments require additional analysis or significant modifications.
19. Within 30CD, Transmission Provider will issue a draft Large Generator Interconnection Agreement
20. Within 30CD, Interconnection Customer shall execute Large Generator Interconnection Agreement or request filing unexecuted or initiate dispute resolution

Notes:
- Capitalized terms identified in this document are defined pursuant to Attachment N of the NV Energy Operating Company’s Open Access Transmission Tariff
- CD shall mean Calendar Days
- BD shall mean Business Days
