Notice: The various JPP's are in the process of adopting final processes and forms for large generator interconnections.

GLOSSARY

Generator Type: CC = Combined Cycle, CT = Combustion Turbine, H = Hydro, IC = Internal Combustion, ST = Steam Turbine, PV = Photovoltaic, WT = Wind Turbine
 Fuel Type: B = Biomass, C = Coal, LFG = Landfill Gas, NG = Natural Gas, NU = Nuclear, O = Oil, S = Solar, W = Wind, WTR = Water
 Interconnection Studies: IFES = Interconnection Feasibility Study, ISIS = Interconnection System Impact Study, IFAS = Interconnection Facilities Study, OS = Optional Study
 JPP: Joint Participation Project(s)
 MPP: Mead Phoenix Project
 PV-PC: Palo Verde - Pinal Central Project
 Study Availability: NA = not applicable, IP = in progress, C = complete

NOTES

- * Interconnection Studies available upon request
- ** Timeline deviation per mutual agreement
