

Notification Process for Outages

TSGT will use the following process for posting and making notifications when a *planned* line outage will affect the availability of specific generation:

- Outage will be posted as done previously, **without** specifically naming the affected generation resources.
- The following text will be included in the Comments/Annotations section of the outage: **“NETWORK CUSTOMERS WITH IMPACTED RESOURCES WILL BE NOTIFIED TO ENSURE REQUIRED OPERATING RESTRICTIONS ARE OBSERVED.”**
- Once the outage is posted to OASIS, and the applicable restrictions to local generation have been received, the TSGT TSO Desk will make any necessary notifications.
