- As provided for in the *Federal Register* Notice published July 27, 2015 (80 FR 44342):
  - Western will provide customers the opportunity to discuss and comment on the recalculated revenue requirements on or before October 31 of each year.
- This meeting provides an opportunity to discuss the proper application of data in the formula rates, not the rate formulas themselves

 /2 Prior-year True-Up of ACTUAL Net SSCD Rev. Reqm't (for transmission) and
 ACTUAL SSCD Revenues (for transmission)
 /3 Including associated true-ups

## Annual comparison (cont.)

- True-up from the Integrated System (IS) is no longer being included (last true-up was in 2017 estimate for IS wrap-up in actual 2015 costs)
- Revenues received for Schedule 1 (SSCD) service may be adjusted which will impact future revenue requirement. SPP recently notified UGP that it has been incorrectly distributing amounts due to Corn Belt for Schedule 1 in UMZ to UGP. True-up reflects this excess revenue.

## SSCD True-Up

- SSCD Costs are included in Gross Transmission ATRR, and must be deducted to get Net Transmission ATRR (in both Estimate and Actual calculations). Therefore, differences between the SSCD estimate and actuals costs are reflected in the Transmission ATRR True-Up. This is <u>NOT</u> the SSCD True-up.
- Separate SSCD True-Up in AS1 Ancillary Rate
  - True-Up = Actual SSCD Revenue Requirement (for transmission) – Actual revenue received (for transmission). Add to Forward Year Estimate.
  - For 2016, \$11,316,099-\$13,604,351 = \$(2,228,252)
