Annual comparison (cont.)

 True-up from the Integrated System (IS) is no longer being included (last true-up was in 2017 estimate for IS wrap-up in actual 2015 costs)

 Revenues received for Schedule 1 (SSCD) service may be adjusted which will impact future revenue requirement.

SSCD True-Up

- SSCD Costs are included in Gross Transmission ATRR, and must be deducted to get Net Transmission ATRR (in both Estimate and Actual calculations). Therefore, differences between the SSCD estimate and actuals costs are reflected in the Transmission ATRR True-Up. This is <u>NOT</u> the SSCD True-up. (See detailed explanation/example in previous 2018 Rates Customer Mtg. Presentation)
- Separate SSCD True-Up in AS1 Ancillary Rate
 - True-Up = Actual SSCD Revenue Requirement (for transmission) – Actual revenue received (for transmission).
 Add to Forward Year Estimate.
 - For 2017, \$10,499,904-\$12,098,637 = \$(1,598,733)

2019 Facility Changes

- A number of new facilities added:
 - Cost recovery for all non-GI related facilities is 100% Zonal in UMZ. No UGP Regional cost recovery yet (likely in 2020 rates due to SPP NTCs assigned to UGP).
 - Network Upgrades identified as pre-SPP join requirements and therefore not part of SPP Planning Process.
 - Maintenance replacements per UGP requirements.
 - GI related facilities due to pre-SPP join GI requests. Facilities funded by Interconnect Customers. No costs in UGP Transmission Plant yet (<u>likely in 2020 rates due to recent</u> <u>legacy GI crediting</u>).
 - New load interconnections. Facilities funded by Customer. No costs in UGP Transmission Plant yet.
- New/changed facilities now summarized in worksheet in .XLS labeled "Facilities Changes 20XX" (Pg. 40 in 2019 PDF)
