Registration

The OATI webSmartOASIS™ Node was developed to provide Open Access Same-time Information System (OASIS) services to the deregulated Energy Industry. Access to the system is obtained through registration with Open Access Technology International, Inc. (OATI) as the OASIS node service provider and system administrator.

Access to the system requires both a company registration and user registration with the OATI webSmartOASIS™ node administrator as well as the OATI webCARES™ administrator. A summary of the registration steps are outlined below.

Complete the following steps to register as a new User on the OATI webSmartOASIS™ system:

1. Register with OATI webCARES™ by following the instructions in the OATI webCARES™ Certificate Information document.

2. Register your company's Entity Code-Roles, Source/Sinks, and POR/POD within the NAESB webRegistry by completing the on-line registration process.

3. Register your company with OATI by completing the OATI webOASIS Company Registration Form. Email the form to support@oati.net.

4. Register your user(s) with OATI by completing the OATI OASIS User Registration Form. Email the form to support@oati.net.

5. OATI Support staff processes requests during business hours (M-F 7:00 AM - 7:00 PM CT).

6. Each Transmission Provider can enable eligible Transmission Customers to purchase transmission service on OASIS. Contact the Transmission Provider(s) directly to request access to purchase transmission service under their tariff(s).

7. OATi has implemented certain OASIS Access Limitations in order to ensure the integrity of the system for all users. Compliance with these limits are enforced automatically in the software.

Questions on the registration process should be sent to support@oati.net, or contact the support personnel directly at (763) 201-2020.
