

2017 ATC Projected Budget and Rates
Stakeholder Inquiries

On October 10, 2017, Madison Gas and Electric (MG&E) asked the following question and on October 12, 2017 ATC provided the following response:

MG&E: What is the rationale for assuming 10.82% ROE for all of 2018?

ATC Response: ATC must use the ROE that is in effect and approved by FERC. For the calculation of the 2018 revenue requirement and related rates, we utilized the current authorized ROE of 10.82%. If FERC sets ATC's ROE at a different value, we will recalculate and repost our rates to reflect the new ROE and adjust customer billings accordingly.
