

Portland General Electric
121 SW Salmon Street · Portland, Ore. 97204

May 22, 2022

On May 22, 2022, the KB pipeline will be conducting an in-line utility tool run. This work includes mobilization of the crew at both the Williams-KB Pipeline gate station, and at the KB pig receiver, at the Beaver Thermal Generation plant.

During this project, Beaver, and Port Westward units will be offline. Port Westward tie-in location, MLV-4, will be closed and isolated during the run event. It is expected that the job will be complete by May 22.

If you have questions, please contact Justin Mills at 503-464-2957.
